Chennai, 600118, India

I'm an aspiring data scientist with a passion for turning raw data into powerful insights. I'm highly interested in building predictive analytical models, cleaning data, and visualizing trends to enable smarter decision-making. Fueled by curiosity and equipped with Python, SQL, and strong analytical thinking, I bring a problem-solving mindset to every project. With a solid foundation in statistics, I aim to make data-driven decisions accessible and impactful. I'm always eager to learn, collaborate, and innovate in the world of data!

Skills

- Complex Problem Solving
- Creative Thinking
- Initiative and Problem-solving Abilities
- Analytical Skills

Education

**B.tech Artificial Intelligence
and Data Science,
Rajalakshmi Institute of
Technology, Chennai**

September 2023 – September 2027

Projects worked

Crypto Currency Price
Prediction Model

April 2024

Developed a machine learning model to predict cryptocurrency prices using a live dataset. Implemented ARIMA for statistical time series forecasting and LSTM neural networks to capture complex patterns and temporal dependencies in the data. The project involved real-time data extraction, trend analysis, and performance evaluation of both models. This predictive system provides valuable insights for investors and helps anticipate market movements with greater accuracy

Courses

Data Science with Python, Simplilearn

September 2023

Intro to AI Ethics, Kaggle

August 2024

Python Libraries for Data Science, Simplilearn

November 2024

Hobbies

Badminton, Music Production

Languages

English

Tamil
